METAL SHARK  
ALUMINUM BOATS

# 21 RELENTLESS

The Metal Shark 21 Relentless is a welded aluminum center console with a versatile, crew-friendly layout ideal for law enforcement, security, and response missions. With its unique progressive-deadrise hull design, the 21 Relentless can traverse the shallows with ease, while still providing a comfortable ride in rough seas. Constructed of heavy duty 5086 aluminum alloy, it is rugged, tough, and ready to take on whatever comes its way. Our Relentless series models are characterized by their performance hulls and by their sheathed foam collar fendering system that provides impact protection during docking, boarding, or alongside maneuvers. Integrated dive reliefs on both the port and starboard side facilitate boarding and recovery operations.

# 21 RELENTLESS

**Console, Dash, & Integrated T-top:** The 21 Relentless features a welded aluminum console with integrated canvas T-top and an acrylic windscreen that combine to provide protection from the elements. A large dash area easily accommodates all controls and electronics. Like all Metal Sharks, the 21 Relentless is a fully custom vessel that is built to order, so the customer may determine the dash components as well as their layout.

# 21 RELENTLESS

**Fully Custom::** Like all Metal Sharks, the 21 Relentless may be fully customized to suit a wide array of mission requirements. From various seating options (leaning post, bench, shock-mitigating military seats, etc.) to special mission-specific options such as fire pump and monitor, davit with winch, gun locker, engine protection bar, special electronics and more, the 21 Relentless may be specially tailored as required. We invite you to contact us today to begin the process of designing your very own Metal Shark 21 Relentless.

# 21 RELENTLESS

## SPECIFICATIONS:

LOA.....21'  
Beam.....8' 6"  
Draft.....1' 6"  
Std. fuel cap.....70 gal  
Weight.....2,700 lb (dry)  
Max HP.....400

## KEY FEATURES:

Heavy Duty Welded Aluminum Hull, Cockpit and Side Decks  
Shallow Draft Hull Foam Floatation Below Decks and in Gunnels  
Self Bailing Cockpit with 6" Scuppers  
Welded Aluminum Console with Side Access Door and Lexan Windscreen  
Pipe Style Leaning Post w/Cushion  
Full Transom Bulkhead  
(6) 8" Welded Cleats  
Welded Aluminum Bow & Stern Eyes  
Baffled Aluminum Fuel Tank  
Craft shown with optional equipment  
Hydraulic Steering with Stainless Wheel  
Navigation Lights  
Bow Deck with Storage Compartment and Hatch  
Dual Battery Switch & Wiring  
Flat Deck Bow to Stern  
2000 GPH Bilge Pump with Auto/Manual Control  
Winter Drain Plug  
Non-Skid Decks and Gunnels  
Integrated Urethane Sheath-Wrapped Foam Fendering System  
Dive Reliefs – Port & Starboard

## COLLAR & HULL FENDERING SYSTEM:

Heavy-Duty Sheath-Wrapped Foam Collar  
Bolt Rope Style Attachment System  
Black rub strake  
Anti-fouling paint preparation behind collar  
Custom color choices & UV coating protection  
Integrated dive relief cutouts

## SPECIAL NOTE:

As a fully custom designer and manufacturer, Metal Shark routinely modifies vessels to meet a customer's specific requirements. Customization may entail anything from altering the physical dimensions and capacities of the vessel to the installation of specialized equipment and accessories. Electronics, seating, paint finish (if desired) and virtually any other aspect of the vessel's features may be determined by the customer.

The specifications and key features shown here are representative of a common vessel setup and are given for reference only.
