

## **JOB OPENING**

### **Outfit Supervisor**

#### **Job Description:**

Metal Shark is a market leader in the design and production of military, commercial and recreational boats and small ships up to 250' in length. As an Outfit Supervisor, you will lead and train an outfit department of electrical, mechanical and pipe supervisors to commit to a schedule and work cohesively as one team. This role will demand knowledge in piping, electrical, mechanical and carpentry systems related to the shipbuilding industry, and can coordinate the work being completed. Knowledge of subcontractor's working schedules and coordination of their contracts in conjunction with production work being done is a further requirement of this position. You will work with your team of supervisors, to commit to a common goal of building quality boats on time and on budget.

Metal Shark is a young and dynamic company with a technology-centric approach to shipbuilding. Innovative thinkers, self-starting leaders and driven performers thrive in our environment. We are a growing small business, and as such, job descriptions evolve over time. It is likewise expected you will be flexible with evolving your role, based on need as well as your areas of aptitude and interest.

#### **Daily Duties:**

##### Outfit Supervisor

- Lead a multi department of supervisors in outfitting boat projects.
- Reporting to senior management of the yard, with the responsibility of building trust and commitment
- Manage the supervisors, plan the work and confirm material to support a build schedule for boat projects
- Liaison with supply chain, engineering, project management and subcontractors
- Be a troubleshooter, and be proactive and make timely decisions and solve problems.

#### **Candidate Requirements**

- 7-10 years of progressive work experience in all systems related to boat building industry.
- Shipbuilding knowledge and technical knowledge of associated drawings and specifications.
- Knowledge and experience in fabrications, installations, QA and commissioning
- Intermediate to advanced skills with Microsoft Office (Word, Excel, Power Point)
- Detail oriented, highly organized, ninja-level multitasking skills.
- Proven team leadership and influencing skills. Must be a clear and direct communicator.

The following characteristics and skills will move your resume to the top of the pile:

- Experience in marine industry, especially past project management in a boat/ship building environment
- Experience with MRP, material planning/management, boatbuilding work flows, etc.
- AutoCAD experience and/or familiarity with 3D modeling systems
- More than 10 years' experience in the industry especially in a management position
