METAL SHARK  
ALUMINUM BOATS

# 36 COURAGEOUS

Metal Shark's 36' Courageous, shown here in a custom configuration designed and built specifically for the U.S. Navy, is a rugged and reliable workboat platform well suited for law enforcement, fire rescue response, towing, hauling, or any other application where a large workspace and ample payload carrying capacity are key considerations. With the many optional features explained on these pages, this particular vessel serves as an example of the extent to which Metal Shark can customize a given platform to meet virtually any mission requirement. Metal Shark offers Courageous workboat models in sizes from 21' to 36'. Additional sizes, configurations, and options not shown are also available.

METAL SHARK  
ALUMINUM BOATS

# 36 COURAGEOUS

Custom 36 Courageous shown here with numerous special options including forward hydraulic-actuated A-frame and bow door, pusher knees, and trapezoidal heavy duty rubrail. Starting with a blank slate, Metal Shark can custom-build a Courageous center console workboat to meet your exacting specifications.

METAL SHARK  
ALUMINUM BOATS

# 36 COURAGEOUS

36 Courageous with custom three-sided helm enclosure (in lieu of standard center console), optional shock mitigating helm seating, in-dash electronics, overhead electronics mounting pod, and shock absorbing cockpit flooring. For this particular application, the helm enclosure has been designed to fold away for transport via C-130 aircraft.

# 36 COURAGEOUS

Generator, batteries, and battery switches are accessed via large, gasketed hatches in the aft deck and cockpit wall. Sound reduction panels are strategically placed to insure quiet operation.

METAL SHARK  
ALUMINUM BOATS

# 36 COURAGEOUS

Large port and starboard aft cockpit dive doors facilitate water access and retrieval operations. Shock absorbing cockpit floor panels are easily removed to reveal Versa-Track in-floor modular component system.

METAL SHARK  
ALUMINUM BOATS

# 36 COURAGEOUS

Enormous aft cockpit with in-floor Versa Track system to accommodate removable dive tank modules, welding units, or aluminum tool boxes (shown).

Navigation Lights  
Two 3,700 GPH Bilge Pumps w/ Auto/Manual Control  
Garboard Drain Plug  
Non-Skid Decks and Gunnels

## SPECIAL NOTE:

As a fully custom designer and manufacturer, Metal Shark routinely modifies vessels to meet a customer's specific requirements. Customization may entail anything from altering the physical dimensions and capacities of the vessel to the installation of specialized equipment and accessories. Electronics, seating, paint finish (if desired) and virtually any other aspect of the vessel's features may be determined by the customer.

Any specifications shown here are representative of a common vessel setup and are given for reference only.
